CONTINUOUS PASSIVE MOTION (CPM) MACHINES

National Rehab (NR) provides a comprehensive range of programs, products and services to streamline the treatment of orthopedic conditions. NR is also a leading provider of wound care, urological, ostomy and incontinence products.

For more than 20 years, NR has earned the reputation among patients, healthcare providers and insurers alike as being patient-centric. With fast, efficient and empathetic service, patients and healthcare professionals have peace of mind knowing they truly have a partner that puts their needs first.

FEATURES AND BENEFITS
- Post-operative devices are designed to aid in recovery after joint surgery.
- Machines repeatedly flex and extend affected joints through a prescribed arc of motion for an extended period of time to lessen the adverse effects of immobilization and trauma to the joints.
- Easy-to-read remote control allows patient to start and stop motion and make adjustments.
- Models are anatomically designed to fit knee, elbow or shoulder.
- NR Customer Service will verify the patient’s insurance coverage for rental equipment, as well as coordinate delivery and pickup of the unit.

INDICATIONS FOR USE
- Total knee replacement and knee ligament repair
- Elbow surgery
- Shoulder surgery

CONTRAINdications FOR USE
- Unstable fractures or warped joint surfaces
- Paralysis
- Bone cancer
