

# Program Overview

## Lymphedema Compression Pumps and Services

### [ National Rehab's Lymphedema Pump Program ]

National Rehab has developed a Lymphedema pump program that is compatible with **oncology, home health, outpatient wound care, physical therapy and rehab facilities.** Our comprehensive program includes:

- + State-of-the-art pneumatic compression pumps, as well as custom and off-the-shelf sleeves from Bio Compression Systems, Inc., the leading manufacturer of lymphedema equipment
- + Trained clinicians that provide support to healthcare professionals, insurance providers and patients
- + Convenient patient care locations
- + Processing of all insurance documentation and direct billing on the patients' behalf to Medicare, Medicaid and commercial providers

### [ Compression Pump Therapy has Proven Successful in Treating a Wide Array of Conditions including: ]

- Congenital or hereditary lymphedema
- Post-surgical lymphedema from cancer surgery  
*(breast, prostate, ovarian and uterine)*
- Post-radiation therapy
- Blockage due to cancerous tumor
- Chronic venous insufficiency
- Patient has had a non-healing wound for 6 continuous months
- Other therapies have been employed without results  
*(stockings, wraps, exercise, elevation)*
